AMIR BARUCH

IN A NUTSHELL 🎯

I am a **Product Leader** driven by a passion for solving real-world problems that impact many people.

With **15** years of experience in mobility, navigation, mapping, last-mile delivery, and automotive, I thrive on working with anything that moves in space.
As a **System** Thinker, I thrive on optimization challenges. Last year with Bolt, I generated approximately **€60M** by enhancing utilization and reducing costs through location-aware smarts.

I am a **strategist** who knows where to focus to make a significant impact. I embrace tough decisions and am not afraid to challenge the status quo.

I firmly believe in the power of **small**, diverse teams pursuing ambitious goals, one step at a time.

EXPERIENCE 💼

STELLANTIS

DIRECTOR, PRODUCT MANAGEMENT
GEO, MAPS & AGENTIC AI, STELLANTIS

2023 - CURRENT

*Stellantis is the fourth-largest **automaker** globally, producing well-known brands like Fiat, Peugeot, and Jeep, and selling over **3.2** million vehicles annually.*

I lead the development of AI-powered, voice-first navigation products and the foundational mapping platform supporting 12 automotive brands. From the first year, these innovations have generated a significant impact starting with cost reduction, reaching high **tens of millions €** annually.

At the same time, I'm heading up Stellantis''s ***Conversational Personal Assistant domain***, where we're changing the way drivers interact with their cars by using the latest AI and large language models (LLMs) in a smart, cost-effective way..

I built a team that transformed the automaker's software development from siloed operations to a collaborative model. By bringing together product, design, data science, and engineering, we created an environment focused on impact and data-driven decisions.

I manage and mentor a team of five product managers across various domains, providing coaching and ensuring strategic alignment.

Bolt

PRODUCT MANAGEMENT LEAD
GEO, ROUTING, ETA & MAPS, BOLT

2021-2023

*Bolt is a global **super-app**, with over 100 million customers that provides ride-hailing, food, scooters and, car sharing services.*

Led Bolt's Geo Group domains of Routing & ETA, Tracking, Mobile and Maps. ~**25** people including data scientists, analytics, backend and mobile engineers.

Developed scalable location services that enabled a shift to self-reliance, outperforming well-known external solutions in benchmark tests

Set the group's vision, strategy, yearly budget planning, roadmap and quarterly execution. All with impact first **prioritization**.

2023's confirmed impact reached ~**€10M** incremental + **€50M** non incremental.

Built & executed a plan for generating **new revenue streams** off of Geo's data and services to deal with slowly diminishing returns. A contract with a first customer was signed early 2023
